As part of the national COVID-19 vaccination campaign led by the Libyan National Centre for Disease Control (NCDC), IOM conducted awareness-raising sessions on COVID-19 vaccines for a total of 200 adult migrants in community settings in three municipalities during the tenth week. Trained IOM community mobilizers, accompanied by medical teams provided the migrants with critical information on COVID-19 vaccines, including its importance, dosage, side effects and addressed questions and concerns related to the vaccination processes.

During the tenth week, 320 people (193 migrants and 127 Libyans) have received either Sinopharm or AstraZeneca vaccines.

By the end of the tenth week, a total of 7,559 migrants (616 females and 6,943 males) have received either Sinopharm or AstraZeneca vaccines, out of which, 2,102 migrants (28%) have received two doses and are fully vaccinated (including the migrants who received the first dose before 3 October 2021). Vaccines were provided and administered by NCDC.
