

INTRODUCTION

This snapshot summarizes available data on Sudanese nationals in Lebanon from IOM's Migrant Presence Monitoring (MPM) Round 2. Data collection took place between May and July 2022.¹ The MPM baseline assessment is designed to systematically assess, through a series of MPM Rounds, neighborhoods (admin level 4) in Lebanon to quantify the presence of migrants and support operational assistance, coordination, and planning. Data collection is based on estimations received from Key Informants who are mostly composed of migrant community representatives, Mukhtars - local authorities of these areas, and Municipality officials. A first round of data collection took place between October 2020 and June 2021.²
