

3
Points of Entry

1,160
Total movements (incoming and outgoing) observed

OVERVIEW

During the COVID-19 pandemic, IOM's Displacement Tracking Matrix (DTM), in collaboration with the World Health Organization (WHO), monitors the movements to and from Nigeria's Adamawa and Borno States in the North East Nigeria. Assessments are conducted at Points of Entry located along the border with Cameroon.

During the period 01 - 31 July 2021, 1,160 movements were observed at three Points of Entry in Borno state. Of the total movements recorded, 521 were incoming from the Far North Region in Cameroon and 28 from N'djamena in Chad. Additionally, 611 outgoing movements were recorded from Borno State to the Far North Region in Cameroon.

A range of data is collected during the assessments to better inform on travellers' nationalities, sex, reasons for moving, mode of transportation and timeline of movement as shown in figures 1 to 4 below:

NATIONALITIES OF TRAVELLERS (FIG. 1)

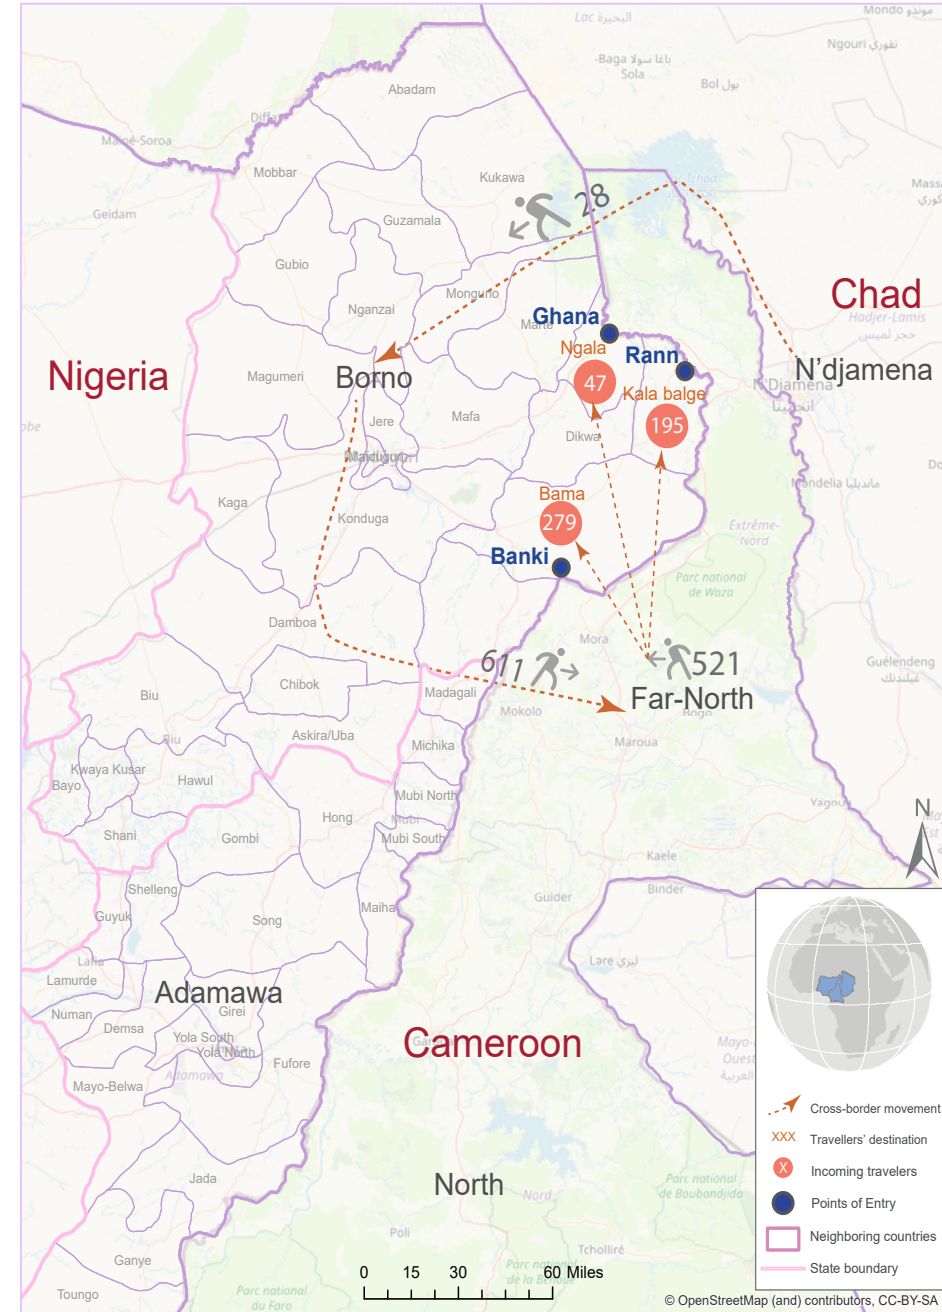

REASONS FOR MOVEMENT (FIG. 3)

Reasons for Movement	Number of Individuals	Percentage
Movement Due to Insurgency	26	2%
Family visit	139	12%
Economic Migration	184	16%
Short Term Local Movement	357	31%
Seasonal	454	39%
Grand Total	1160	100%

SEX (FIG. 2)

MODE OF TRANSPORTATION (FIG. 4)

The map is for illustration purposes only. The depiction and use of boundaries, geographic names and related data shown are not warranted to be error free nor do they imply judgment on the legal status of any territory, or any endorsement or acceptance of such boundaries by IOM.

PASSENGERS HEALTH SCREENING

Enumerators stationed at Points of Entry conduct interviews with travellers and collect information about travellers' points of departures, intended destinations, vulnerabilities, reasons for travel and modes of transportation. Additional questions concerning the COVID-19 pandemic are asked to determine if travellers exhibit any symptoms of COVID-19; if they recently were in contact with individuals exhibiting symptoms of COVID-19 or might have died from it.

Furthermore, the assessments serve to evaluate whether travellers sought medical care or took medication in the 24 hours preceding the interviews and to verify whether they are aware of whom to call in case of emergency. The results are shown in figures 5 to 10.

HAVE YOU SOUGHT ANY MEDICAL CARE IN ANY HEALTH FACILITY WITHIN THE LAST 14 DAYS? (FIG. 5)

HAVE YOU HAD ANY OF THESE SYMPTOMS (FEVER, COUGH) IN THE LAST 14 DAYS? (FIG. 7)

TEMPERATURES TAKEN (FIG. 6)

HAVE YOU COME IN CONTACT WITH ANYONE WHO IS SICK IN THE LAST 14 DAYS? (FIG. 8)

HAVE YOU TAKEN ANY OF THE FOLLOWING MEDICATION IN THE LAST 14 DAYS? (FIG. 9)
