## IOM REGIONAL OFFICE FOR SOUTHERN AFRICA | DECEMBER 2021

## **FMP NETWORK**

IOM works with national and local authorities in order to gain a better understanding of population movements throughout Southern Africa. Through the setup of Flow Monitoring Points (FMPs), IOM seeks to quantify migration flows, trends and routes and to gain a better understanding of the profiles of observed individuals at entry, transit or exit points (such as border crossing posts, bus stations, rest areas, police checkpoints and reception centres). This report is an overview of the data collected in these FMPs from 1 to 31 December 2021.\*

Inter-regional migration from and within the Southern Africa is categorized along the following corridors. The Flow Monitoring Points (FMPs) were set-up in several key transit locations along the corridors to track the movements of passengers:

- Zimbabwe (Mutare) Mozambique (Manica)
- Zimbabwe Zambia (Chirundu)
- Zimbabwe Botswana (Plumtree)
- Zimbabwe (Beitbridge) South Africa
- Malawi (Mchinji) Zambia (Mwami)
- Malawi (Karonga) Tanzania
- Malawi (Mwanza) Mozambique (Zobue)
- Malawi (Mulanje) Mozambigue

During December 2021, a total of 116,051 movements were observed across 44 FMPs in the region.

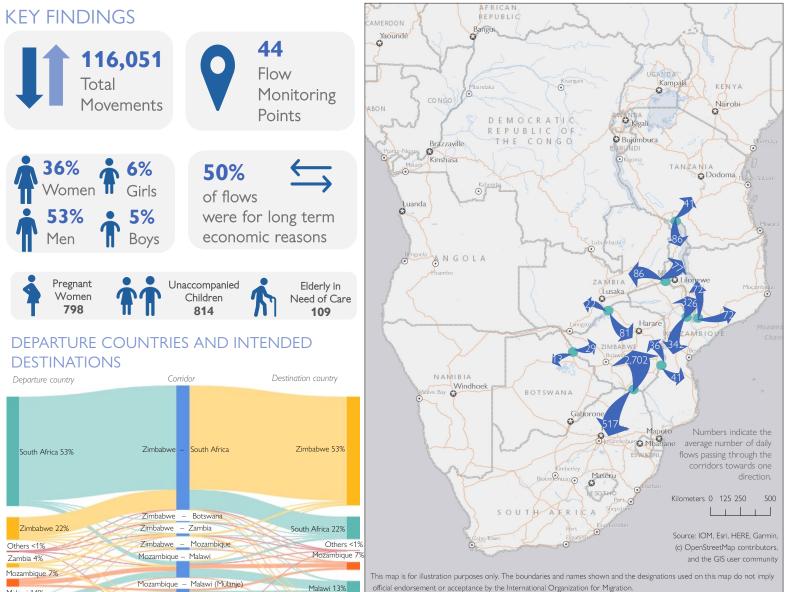

The Zimbabwe – South Africa corridor hosted the largest number of movements with 90,133 (78%) followed by the Malawi (Mwanza) - Mozambique (Zobue) corridor with 12,033 (10%) and the Malawi – Zambia corridor with 4.569 movements reported (4%).

## ZIMBABWE (MUTARE) - MOZAMBIQUE (MANICA) | DECEMBER 2021

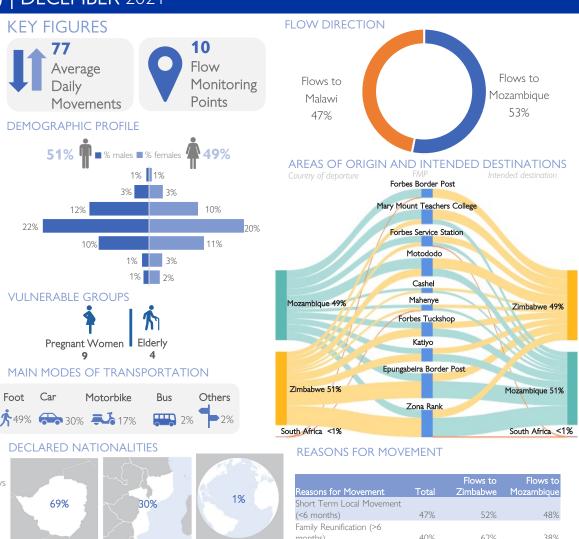

### **OVERVIEW**

Over the reporting period, a total of 1,778 cross-border movements were observed at the Flow Monitoring Points (FMPs). The average daily number of flows was 77. This represented a 29 per cent decrease compared to November during which 109 individuals were observed on a daily basis. Zimbabwe (51%) and Mozambique (49%) were the main countries of departure while Mozambigue (51%) and Zimbabwe (49%) were the main countries of intended destination of individuals passing through the different FMPs. Out of 1,778 individuals observed, 51 per cent were males and 49 per cent were females. There were nine women who were visibly pregnant. Boys and girls (males and females below 18) made up eight per cent of the individuals observed.

## ZIMBABWE - ZAMBIA (CHIRUNDU) | DECEMBER 2021

### **OVFRVIFW**

Over the reporting period, a total of 2,068 cross-border movements were observed at the Flow Monitoring Points (FMPs). The average daily number flows was 103. This represented a 14 per cent increase compared to November during which 90 individuals were observed on a daily basis. Zambia (68%), Zimbabwe (16%) and South Africa (9%) were the main countries of departure while Zimbabwe (75%), Zambia (17%) and South Africa (4%) were the main countries of intended destination of individuals passing through the different FMPs. Out of 2,068 individuals observed, 42 per cent were males and 58 per cent were females. There were 62 women who were visibly pregnant. Boys and girls (males and females below 18) made up 12 per cent of individuals observed. Of 27 children observed, 19 were unaccompanied girls and 8 were unaccompanied boys. However, this information is based on direct observation and self-reporting, therefore is likely under-reported.

## ZIMBABWE - BOTSWANA (PLUMTREE) | DECEMBER 2021

## **OVERVIEW**

Over the reporting period, a total of 888 cross-border movements were observed at the Flow Monitoring Points (FMPs). The average daily number flows was 42. This represented 83 per cent increase in the number of movements compared to November during which 23 individuals were observed daily. Botswana (50%), Zimbabwe (32%) and South Africa (17%) were the main countries of departure and Zimbabwe (67%), Botswana (27%) and South Africa (5%) were the main countries of intended destination of individuals passing through the different FMPs. Out of 888 individuals observed, 55 per cent were males and 45 per cent females. There were four women who were visibly pregnant. Boys and girls (males and females below 18) made up 10 per cent of the individuals observed.

### **OVERVIEW**

Over the reporting period, a total of 90,133 cross-border movements were observed at the Flow Monitoring Points (FMPs). The average daily number flows was 3,219. This represented a 63 per cent increase compared to November during which 1,971 individuals were observed on a daily basis. This increase in the number of movements is explained by Zimbabwe nationals moving back to their country to spend there the Christmas holidays. South Africa (84%) and Zimbabwe (16%) were the main countries of departure whilst Zimbabwe (84%) and South Africa (16%) were the main countries of intended destination of individuals passing through the different FMPs. Out of 90,133 individuals observed, 56 per cent were males and 44 per cent were females. There were 563 women who were visibly pregnant. Boys and girls (males and females below 18) made up 12 per cent of the individuals observed. Meanwhile, 696 were unaccompanied children.

## MALAWI (MCHINJI) - ZAMBIA (MWAMI) | DECEMBER 2021

### **OVERVIEW**

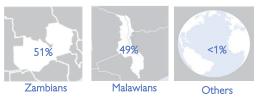

Over the reporting period, a total of 4,569 cross-border movements were observed at the Flow Monitoring Points (FMPs). The average daily number flows was 163, which represents a 29 per cent decrease from November, when the daily average movements was 228. Malawi (62%) and Zambia (38%) were the main countries of departure while Zambia (38%) and Malawi (62%) were the countries of intended destination of individuals passing through the different FMPs. Out of 4,569 individuals observed, 58 per cent were males and 42 per cent were females. There were 61 women who were visibly pregnant. Boys and girls (males and females below 18) made up 12 per cent of the individuals observed.

## MALAWI (KARONGA) - UNITED REPUBLIC OF TANZANIA | DECEMBER 2021

#### **OVERVIEW**

Over the reporting period, a total of 1,425 cross-border movements were observed at the Flow Monitoring Points (FMPs). The average daily number flows was 83, which represents a 26 per cent increase from November, when the daily average movements was 66. Malawi (51%), United Republic of Tanzania (46%) and Democratic Republic of the Congo (2%) were the main countries of departure, while Malawi (53%) and United Republic of Tanzania (46%) were the main countries of intended final destination of individuals passing through the different FMPs. Out of 1,425 individuals observed, 58 per cent were males and 42 per cent were females. Boys and girls (males and females below 18) made up 10 per cent of the individuals observed. There were 22 women who were visibly pregnant and two children below 18 who were traveling alone. However, this information is based on direct observation and self-reporting, therefore is likely under-reported.

## MALAWI (MWANZA) - MOZAMBIQUE (ZOBUE) | DECEMBER 2021

### OVERVIEW

Over the reporting period, a total of 12,033 cross-border movements were observed at the Flow Monitoring Points (FMPs). The average daily number flows was 669. This represented a 8 per cent decrease compared to November during which 730 individuals were observed on a daily basis. Malawi (40%), South Africa (28%) and Mozambique (27%) were the three main countries of departure, while Malawi (56%), Mozambique (25%) and South Africa (19%) were the three main countries of intended destination of individuals passing through the different FMPs. Out of 12,033 individuals observed, 71 per cent were males and 29 per cent were females. There were 29 women who were visibly pregnant. Boys and girls (males and females below 18) made up nine per cent of the individuals observed.

## IOM DISPLACEMENT TRACKING MATRIX

## MALAWI (MULANJE) - MOZAMBIQUE | DECEMBER 2021

### **OVERVIEW**

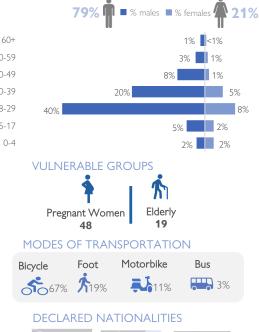

During the month of December, data collection activities were conducted for first time in the Malawi – Mozambique (Mulanje) corridor. Over the reporting period, a total of 3,157 cross-border movements were observed at the Flow Monitoring Points (FMPs). The average daily number flows was 144. Malawi (50%) and Mozambique (50%) were the main countries of departure, likewise, Malawi (50%) and Mozambique (50%) were the main countries of intended destination of individuals passing through the different FMPs. Out of 3,156 individuals observed, 79 per cent were males and 21 per cent were females. There were 48 women who were visibly pregnant. Boys and girls (males and females below 18) made up 12 per cent of the individuals observed.

## **KEY FIGURES**

## IOM REGIONAL OFFICE FOR SOUTHERN AFRICA | DECEMBER 2021

## METHODOLOGY

Flow Monitoring is a data collection activity which seeks to gather key information on mobility and migrant profiles. It begins by identifying zones in which large mobility flows occur and highlighting the characteristics and journeys of travellers in these zones. DTM teams, with the support of local authorities and partners, identify strategic points of transit, where Flow Monitoring Points (FMPs) are set up. At each FMP, DTM conducts two main activities: Flow Monitoring Registry (FMR) and Flow Monitoring Surveys (FMS). This report focuses on FMR data only. The FMR collects data at FMPs through direct observation and interviews with key informants, including staff working at transit stations, border patrol officers, local authorities, bus or taxi drivers and travellers themselves. The FMR gathers data on the number of travellers crossing FMPs, as well as the provenance, next destination, vulnerabilities and means of travellers. At each FMP, data is collected by a team of enumerators. Data collection is carried out daily, between 8:00 am and 5:00 pm. Enumerators collect data via a mobile data collection form to ensure data integrity and quality. This report is an overview of the data collected from 1 to 31 December 2021.

Flow Monitoring Point: Flow Monitoring Points (FMPs) are points set up by IOM's Displacement Tracking Matrix in high mobility areas in each country covered (near borders or main travel routes).

## LIMITATIONS

Data collected in the framework of Flow Monitoring activities are the result of direct observations and interviews conducted at FMPs between 8:00 am and 5:00 pm. The data are not representative of all migration flows in the border area, and, because they only reflect the situation of observed or surveyed individuals, cannot be generalized. Temporal coverage of the data collection exercises is also limited to a specific time window. While data is collected daily, Flow Monitoring activities do not capture all flows transiting through FMPs. Data on vulnerability is based on direct observation and self-reporting. Therefore, the findings should be understood as mainly indicative.

Data collected for these exercises should be understood as estimations only. IOM does not make any warranties or representations as to the appropriateness, quality, reliability, timeliness, accuracy or completeness of the data included in this report.

On occasions demographic percentages do not sum to 100 per cent due to rounding in calculations, as it also occurs when breaking down the relative flows of different nationalities through a border crossing.

The opinions expressed in the report are those of the authors and do not necessarily reflect the views of the International Organization for Migration (IOM). The designations employed and the presentation of material throughout the report do not imply the expression of any opinion whatsoever on the part of IOM concerning the legal status of any country, territory, city or area, or of its authorities, or concerning its frontiers or boundaries. IOM is committed to the principle that humane and orderly migration benefits migrants and society. As an intergovernmental organization, IOM acts with its partners in the international community to: assist in the meeting of operational challenges of migration; advance understanding of migration issues; encourage social and economic development through migration; and uphold the human dignity and well-being of migrants.

The maps displayed in this report are for illustration purposes only. The depiction and use of boundaries, geographic names and related data shown on maps and included in this report are not warranted to be error free nor do they imply judgment on the legal status of any territory, or any endorsement or acceptance of such boundaries by IOM.
