# WEEKLY FLOW MONITORING SNAPSHOT

14 - 20 APRIL 2024, DATA UPDATED AS OF 21:00 ON 20 APRIL

### **OVERVIEW**

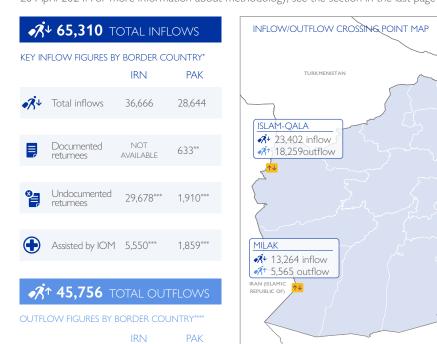

Total outflows

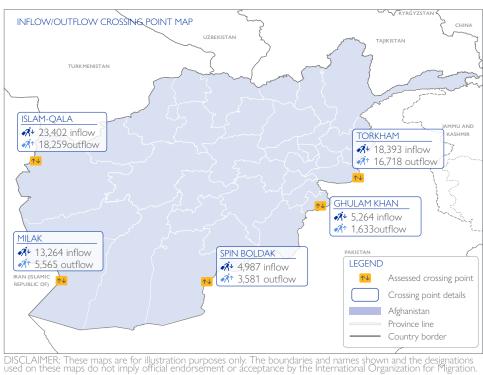

23.824

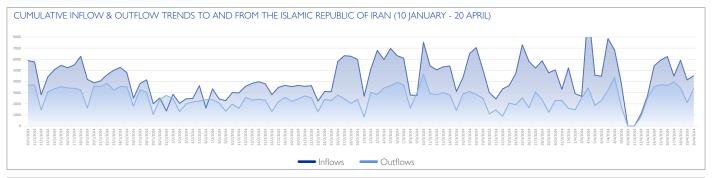

21.932

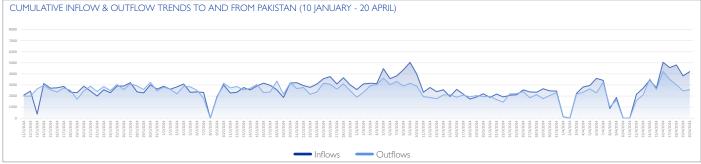

IOM Afghanistan's DTM Flow Monitoring activity, initiated at the beginning of 2024, seeks to quantify and better understand the mobility dynamics at Afghanistan's borders. On 10 January 2024, DTM began deploying field teams at four border crossing points with the Islamic Republic of Iran (IRN) and Pakistan (PAK), expanding to another border crossing point Ghulam Khan as of 11 February (see map below for the locations of all five crossing points), to conduct two interlinked exercises. The first is a headcount of all individuals entering or leaving Afghanistan (including returnees), also called Flow Monitoring Counting (FMC), to gauge flow volume. The second is a survey of randomly selected Afghan national individuals or groups entering or leaving Afghanistan, also called the Flow Monitoring Survey (FMS), to understand the profiles, motivations, and vulnerabilities of the target population. The inflow from Pakistan increased over the monitoring period. This may be related to media reports and speculation about a potential resumption of the repatriation process, targeting primarily Afghan Citizen Card (ACC) holders, starting from April 15, 2024. However, as of yet, no formal decision has been announced by the Government of Pakistan concerning the resumption of the repatriation process.

This snapshot provides key findings combining various IOM data sources, including DTM Afghanistan's FMC and FMS activities, DTM Pakistan's Flow Monitoring of Afghan returnees, and IOM Afghanistan's Cross-Border Post-Arrival Humanitarian Assistance (CB-PAHA) program, for the period 14 to 20 April 2024. For more information about methodology, see the section in the last page of this report titled "IOM INFLOW DATA."

<sup>10</sup>re information on the methodology of collecting data on different subsets of inflow groups can be found on the last page of this report in the section titled "IOM"

INPLOW DATA.

\*\*\* Documented returnees include Proof of Registration (PoR) holders. Source: IOM DTM Pakistan and UNHCR Pakistan

\*\*\* This data is collected by IOM CB-PAHA. Individuals receive post-arrival assistance from IOM and support from Border Consortium partners. The Border

Consortium is led by IOM. For more information and access to the Consortium dashboard, visit <a href="https://arghanistan.iom.int/situation-reports">https://arghanistan.iom.int/situation-reports</a>. Consortium is led by IOM. For more information and access to the Consor\*\*\*\*\* DTM Afghanistan does not collect data on subsets of outflow groups.

# → INFLOWS

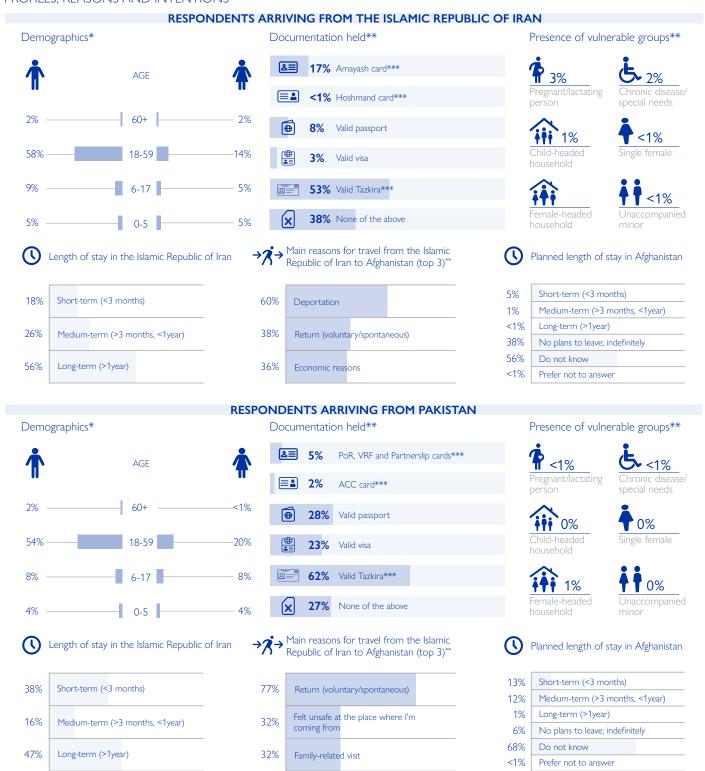

#### FMC TOTAL INDIVIDUALS: 65,310

### FMS TOTAL RESPONDENTS: 4,752

The following analysis compiles responses from 4,752 total Afghan nationals (2,434 at the border with the Islamic Republic of Iran, 2,318 at the border with Pakistan) interviewed by DTM Afghanistan during its FMS activity among individuals and groups entering Afghanistan.

Entering Afghanistan with the intention to transit to a third country was very uncommon; the intended destination of almost all respondents arriving from the Islamic Republic of Iran or Pakistan was Afghanistan. While movements from Iran were mainly characterized by deportees and those traveling for economic reasons, movements from Pakistan involved voluntary returns and family-related visits. Male and female respondents had relatively similar responses regarding their reasons for movement this week, marking a divergence in the trend of male respondents usually being more likely to have moved for economic reasons and female respondents for feeling unsafe in their origin locations. In fact, male and female respondents coming from Pakistan were actually more likely than those coming from the Islamic Republic of Iran to report feeling unsafe in their origin location as a reason for movement this reporting period (32% versus 24%).

## PROFILES, REASONS AND INTENTIONS

<sup>\*</sup> Individuals under 18 were assessed by having an accompanying adult answer on their behalf.

\*\* Multiple answers were possible. As a result, percentages may exceed 100%.

\*\*\* Amayesh, and Hoshmand cards are issued by the Islamic Republic of Iran. Proof of Residence (PoR), Partnerslip, VRF Asylum, and Afghan Citizen Card (ACC) are cards issdued in Pakistan. and Tazkira is the Afghan national ID

### FMC TOTAL INDIVIDUALS: 45,756

### FMS TOTAL RESPONDENTS: 1,739

The following analysis compiles responses from 1,739 total Afghan nationals (643 at the border with the Islamic Republic of Iran, 1,096 at the border with Pakistan) interviewed by DTM Afghanistan during its FMS activity among individuals and groups leaving Afghanistan.

Possessing travel documents, including a passport and visa, was relatively common among those leaving Afghanistan. This stands in contrast with the majority of those arriving to Afghanistan, who were not carrying travel documents. The majority of those going abroad reported that this was their first time leaving Afghanistan. Most respondents going to the Islamic Republic of Iran intended to stay there for a year or less, while most going to Pakistan planned shorter trips; the majority intended to stay less than three months. These intentions reflect respondents' reasons for migration. While family-related visits were a common reason to leave Afghanistan for both those going to Pakistan and those going to the Islamic Republic of Iran, accessing healthcare, which can often constitute a shorter visit, was more common among the former, whereas economic motivations, likely related to employment, were more common among the latter.

#### PROFILES, REASONS AND INTENTIONS

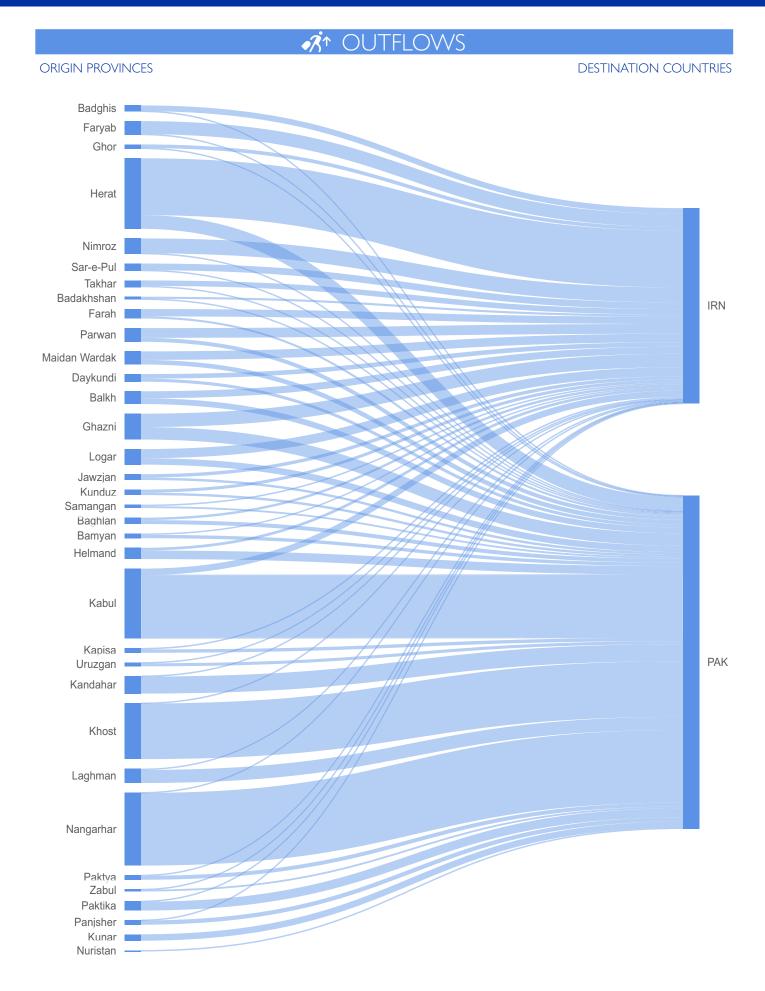

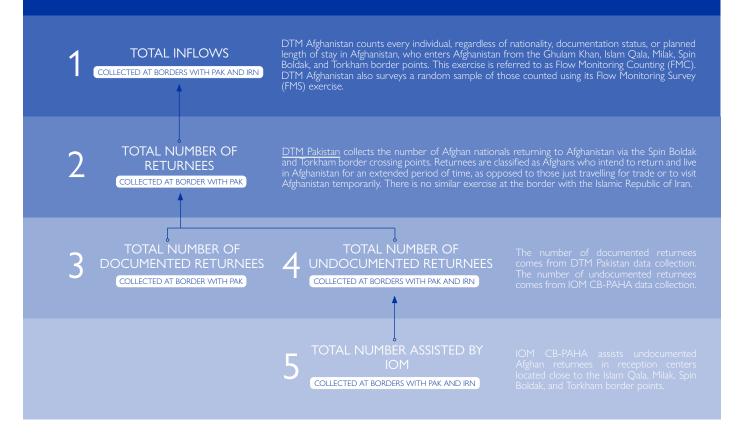

Planned length of stay in Pakistan

<sup>\*</sup> Individuals under 18 were assessed by having an accompanying adult answer on their behalf. \*\* Multiple answers were possible. As a result, percentages may exceed 100%.

## **IOM INFLOW DATA**

DTM Afghanistan, DTM Pakistan, and IOM Afghanistan's Cross Border Post-Arrival Humanitarian Assistance (CB-PAHA) program use different methodologies to collect data on various demographic subsets of individuals entering Afghanistan (inflows). The following flow chart illustrates the relationships between the subsets and how IOM coordinates its various activities and methodologies to develop more robust and comprehensive databases on movements into Afghanistan.

## DATA ON ASSISTED AFGHAN RETURNEES

IOM Afghanistan's CB-PAHA program collects information on undocumented Afghan returnees who pass through reception centers near the border and receive assistance from IOM and Border Consortium partners. The Border Consortium is led by IOM. For more information and access to the Consortium dashboard, visit <a href="https://afghanistan.iom.int/situation-reports">https://afghanistan.iom.int/situation-reports</a>.

### CUMULATIVE TRENDS: NUMBER OF RETURNEES ASSISTED BY IOM (10 JANUARY - 20 APRIL)
