IOM Information Gathering activities are supported by:
Flow monitoring points are placed at known migrant transit points along the Niger migratory route. Data is collected daily at FMPs to inform migrant movements and profiles. The data collected provides a snapshot of migrant movements through the region. The numbers are collected from primary sources and do not claim to reflect all migrants passing through the flow monitoring points.

</tbody>
</table>

### METHODOLOGY

Sources include authorities and direct observation/interviews with passing migrants. Nationality numbers are gathered through estimation based on information given by migrants themselves and the drivers of the vehicles and should be treated as estimations/approximations only.
REPORTING PERIOD
01 August 2016     01 September 2016

SEGUÉDINE - FLOW MONITORING POINT 1

Route used to and from Séguédie:
Agadez (Niger) ↔ Séguédie (Niger) ↔ Gatroun (Libya)
Diffa (Niger) ↔ Séguédie (Niger) ↔ Gatroun (Libya)
Diffa (Niger) ↔ Séguédie (Niger) ↔ Gatroun (Libya)

Overall outgoing and incoming flows since start of data collection

Migrants leave Séguédie in organised convoys every day between Tuesday and Friday hence the peaks of daily flows.

Total number transiting through Séguédie FMP

317516
Total outgoing 244788  Total incoming 72728

Seguédie Demography

Incoming Women 1%
Outgoing Women 10%
Outgoing Men 67%
Male 22%

Main nationalities * recorded at FMP during all data collection period

Séguédie

Outflow
1 Nigeria 20%  Niger 81%
2 Niger 20%  Nigeria 8%
