Global Mobility Restriction Overview

Bi-Weekly Update • 17th August 2020

COVID-19 Mobility Impacts Update Series
https://migration.iom.int • dtmcovid19@iom.int

Overview
The global number of COVID-19 cases continues to mount and has exceeded 21 million (21,294,845 cases and 761,779 deaths) as of 16th August 2020, as per the World Health Organization. With growing number of COVID-19 cases, human mobility and migration remains restricted with new restrictions being imposed. As of 17th August 2020, a total of 219 countries, territories or areas have issued 83,694 travel restrictions indicating an increase of 3 per cent from 81,843 travel restrictions reported on 10th August 2020. There has been an increase of 3 per cent in other limitations like new documents for entry and an increase of 6 per cent in medical restrictions. In parallel to existing travel restrictions, a total of 174 countries, territories or areas have issued 703 exceptions enabling mobility despite blanket travel restrictions. Between 10th and 17th August 2020, 14 countries, territories or areas issued 43 new exceptions whilst 8 countries, territories or areas removed 16 exceptions.

Data Source: IATA and official government websites.

Most Commonly Imposed Restriction Type

*Other limitations include suspended visas on arrival and entry permits, requirements for international travel certificates and medical coverages.

As of 17th August 2020, 219 C/T/As have imposed restrictions. Entry restrictions for passengers from restricted C/T/As have been following a decreasing trend and no longer have the highest share of total restrictions (41%). Medical measures are the most common restriction type representing 46 per cent of restrictions. Changes in visa requirements have also followed a stable trend, continuing to represent a small share (<1%) in total restrictions.

Restrictions Imposed, by type

Important: This analysis does not capture pre-COVID-19 related travel restrictions, rather it draws attention to various travel restrictions issued as a result of COVID-19. This report focuses on the changes to pre-existing measures affecting passengers travelling through specific routes or with specific travel documentation and nationalities. The number of restrictions recorded in this report is indicative of the total number of COVID-19 related travel restrictions since 8th March 2020, when IOM began monitoring the impact of travel restrictions on global mobility as a result of COVID-19. More specifically, this analysis highlights emerging changes as a result of COVID-19 travel requirements to support identifying border management practices. This analysis does not aim to provide information on exact travel requirements. For specific and updated travel information, kindly refer to respective Consular authorities of the destination country. International Air Transport Association (IATA) and relevant airline companies may be a valid alternative to explore.
Changes in Restrictions on Arrival since 10th March 2020

(1*)Restricted entry on passengers coming from other countries, territories and areas (C/T/A).

(2*)C/T/A imposing medical measures, changes in Visa or ID or other measures on arrival.

The opinions expressed in this document do not necessarily reflect the views of the International Organization for Migration (IOM). The designations employed and the presentation of material throughout the document do not imply the expression of any opinion whatsoever on the part of IOM concerning the legal status of any country, territory, city or area, or of its authorities, or concerning its frontiers or boundaries.
Key Restrictive Measure Highlights

- Flight suspensions were extended by Peru until 31st August 2020, by Ghana until 31st August 2020, and by Cayman Islands until 1st October 2020.

- Passenger travel bans were extended indefinitely by Chile, and by Romania until 15th September 2020.

- Uruguay shifted from a flight suspension until 15th August 2020 to a complete passenger ban.

- As the epidemiological situation worsens, authorities in the United Kingdom of Great Britain and Northern Ireland added new restrictions on passengers arriving from Aruba, France, Monaco, the Netherlands, Turks and Caicos Islands who are now subject to mandatory 14-day self-isolation upon arrival from 15th August 2020 onwards.

- Mozambique suspended all flights as of 10th August 2020, except for humanitarian, medical evacuation and return flights. The suspension is expected to be in place until 30th August 2020.

- Tunisia added new restrictions on passengers arriving from Iceland, those passengers who will stay for less than ten days in Tunisia are not allowed to enter.

- Montenegro broadened its 14-day quarantine measure to be applicable to all passengers.

- Authorities in Cambodia issued changes in the new conditions for authorised entry, reducing the previously stipulated deposit amount from USD 3,000 USD to USD 2,000 at a designated bank on arrival, passengers will still need to have proof of insurance with a minimum value of USD 50,000 in addition to the deposit amount.

- Viet Nam added new conditions for authorised entry of passengers traveling for business that are exempt from the travel ban. Such passengers must have an international medical insurance or guarantee that the hosting company will pay if there are COVID-19 treatment costs; and have a COVID-19 test taken by PCR technique, between 3 to 7 days before arrival, in a laboratory approved by the Vietnamese government or through the laboratory system of the World Health Organization.

- From 17th to 31st August 2020, Greece issued new conditions for entry for passengers arriving from Albania, Belgium, Czechia, the Netherlands, North Macedonia, Spain and Sweden who must have a medical certificate with a negative COVID-19 Polymerase Chain Reaction (PCR) test result issued at most 72 hours before arrival. The certificate must be in English.

- United Arab Emirates added new conditions for entry of passengers arriving from the United States of America at Abu Dhabi airport - they must have a medical certificate with a negative COVID-19 Polymerase Chain Reaction (PCR) test result issued at most 96 hours before departure. The certificate must be issued by an approved lab.

- A new condition for passenger entry was issued by Belize as of 17th August 2020, requiring that passengers must have an approval letter issued by Belize’s Ministry of Foreign Affairs prior to arrival.

- Medical conditions for entry were issued by French Polynesia and Egypt requiring a medical certificate with a negative COVID-19 Polymerase Chain Reaction (PCR) test result issued at most 72 hours before departure and arrival, respectively. Similarly, Morocco requests passengers to obtain a serological test issued at most 48 hours before departure in addition to a COVID-19 Polymerase Chain Reaction (PCR) test result issued at most 72 hours before arrival.

- Iraq issued new conditions for authorised entry for passengers traveling to Basra (BSR) and Baghdad (BGW) who must have a medical certificate and a negative COVID-19 Polymerase Chain Reaction (PCR) test result issued at most 48 hours before departure. Additionally, passengers in transit through Basra (BSR) must have a medical certificate a negative COVID-19 Polymerase Chain Reaction (PCR) test result issued at most 72 hours before departure.

- Antigua and Barbuda added a new medical condition for entry including a medical certificate and a negative COVID-19 Polymerase Chain Reaction (PCR) test result issued at most 7 days before departure.
• Airports in Honduras have reopened as of 17th August 2020, however, passengers must provide a medical certificate with a negative COVID-19 Polymerase Chain Reaction (PCR) test result, taken at most 72 hours before departure as well as a completed online form to enter.

• India added Canada to the ‘Air Bubble’ list which permits travel between India and Canada in effect from 15th August 2020.

• As of 10th August 2020, passengers are allowed to enter Dominica, however, they must undergo mandatory medical screening and quarantine for 14 days upon arrival in addition to providing a medical certificate with a negative COVID-19 Polymerase Chain Reaction (PCR) test result valid for no longer than 72 hours before arrival.

• As of 11th August 2020, Burkina Faso lifted the passenger ban and introduced new conditions for authorised entry requiring passengers and airline crew to provide a medical certificate with a negative COVID-19 PCR test result issued at most 5 days before arrival. Passengers and airline crew that do not present a certificate are subject to medical screening at their own expense.

• Armenia lifted the passenger ban and introduced new conditions for entry requiring all passengers to self-isolate for 14 days upon arrival.
