

# FLOW MONITORING REGISTRY REPORT

IOM REGIONAL OFFICE FOR SOUTHERN AFRICA | JULY 2021

## FMP NETWORK

IOM works with national and local authorities in order to gain a better understanding of population movements throughout Southern Africa. Through the setup of Flow Monitoring Points (FMPs), IOM seeks to quantify migration flows, trends and routes and to gain a better understanding of the profiles of observed individuals at entry, transit or exit points (such as border crossing posts, bus stations, rest areas, police checkpoints and reception centres). This report is an overview of the data collected in these FMPs from 1 to 31 July 2021.

Inter-regional migration from and within the Southern Africa is categorized along the following corridors. The Flow Monitoring Points (FMPs) were set-up in several key transit locations along the corridors to track the movements of passengers:

- Zimbabwe (Mutare) – Mozambique (Manica)
- Zimbabwe (Chirundu) – Zambia
- Zimbabwe – Botswana (Plumtree)
- Zimbabwe – South Africa (Beitbridge)
- Malawi (Mchinji) – Zambia (Mwami)
- Malawi (Karonga) – Tanzania
- Malawi (Mwanza) – Mozambique (Zobue)

During July 2021, a total of 20,596 movements were observed across 29 FMPs in the region.

The Zimbabwe – South Africa (Beitbridge) corridor hosted the largest number of individuals with 7,829 (38%) followed by the Mozambique (Manica) –Zimbabwe (Mutare) corridor with 3,262 movements tracked (16%) and the Malawi (Karonga) – Tanzania corridor with 2,667 movements (13%).

## DEPARTURE COUNTRIES AND INTENDED DESTINATIONS

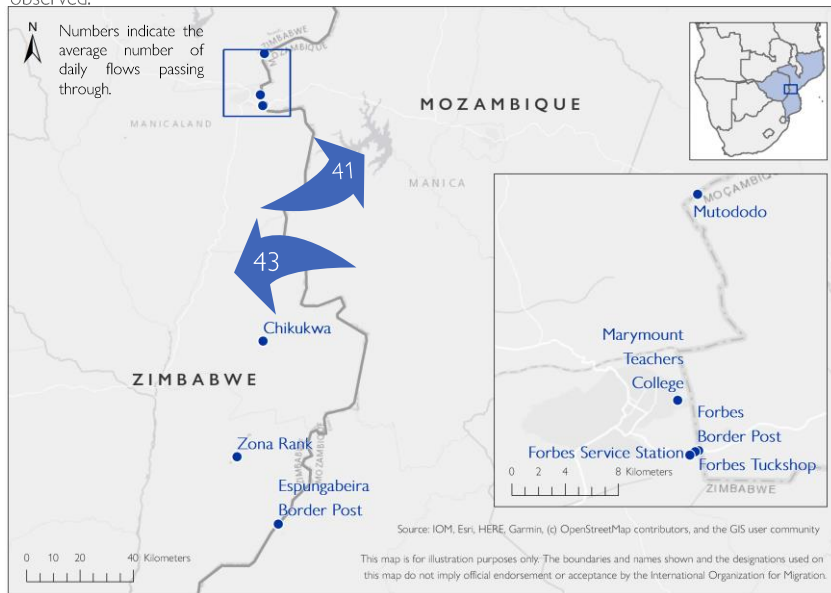

# FLOW MONITORING REGISTRY REPORT

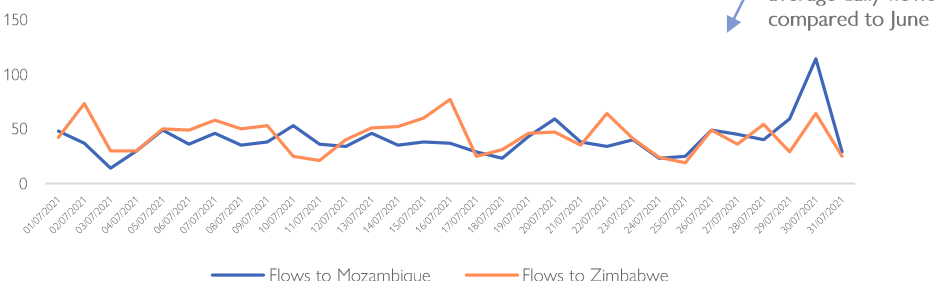

## ZIMBABWE (MUTARE) – MOZAMBIQUE (MANICA) | JULY 2021

### OVERVIEW

Over the reporting period, a total of 2,612 cross-border movements were observed at the Flow Monitoring Points (FMPs). The average daily number of flows was 84. This represented an 18 per cent decrease compared to June during which 102 individuals were observed on a daily basis. Mozambique (51%), Zimbabwe (46%) and Botswana (3%) were the main countries of departure while Zimbabwe (50%) and Mozambique (48%) were the main countries of intended destination. 57 per cent were males and 43 per cent were females. There were 21 women who were visibly pregnant. Boys and girls (males and females below 18) made up four per cent of the individuals observed.

# FLOW MONITORING REGISTRY REPORT

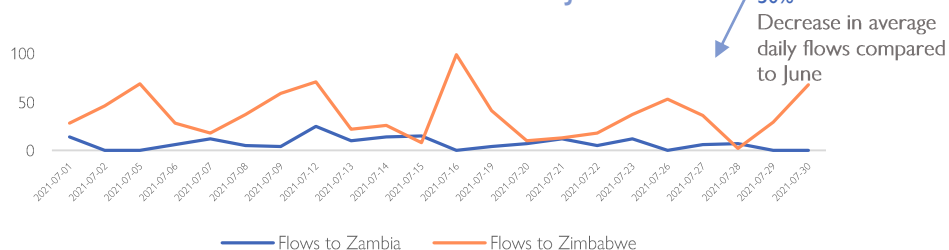

## ZIMBABWE (CHIRUNDU) – ZAMBIA | JULY 2021

### OVERVIEW

Over the reporting period, a total of 976 cross-border movements were observed at the Flow Monitoring Points (FMPs). The average daily number flows was 44. This represented a 50 per cent decrease compared to June during which 88 individuals were observed on a daily basis. The decrease in movements can be attributed to the tightened lockdown measures in Zimbabwe. Zambia (80%), Zimbabwe (10%) and the Democratic Republic of the Congo (5%) were the main countries of departure while Zimbabwe (74%), Zambia (14%) and South Africa (9%) were the main countries of intended destination of individuals passing through the different FMPs. Out of 976 individuals observed, 35 per cent were males and 65 per cent were females. There were 25 women who were visibly pregnant. Boys and girls (males and females below 18) made up nine per cent of the individuals observed respectively. Of 88 children observed, 45 were unaccompanied boys and 19 were unaccompanied girls. However, this information is based on direct observation and self-reporting, therefore is likely under-reported.

# FLOW MONITORING REGISTRY REPORT

## ZIMBABWE – BOTSWANA (PLUMTREE) | JULY 2021

### OVERVIEW

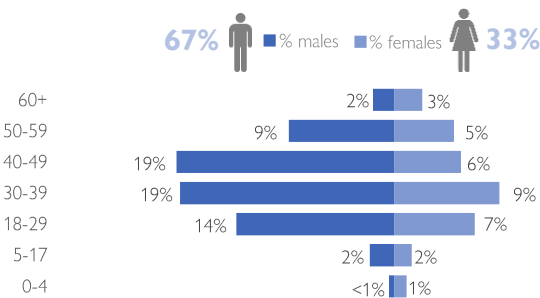

Over the reporting period, a total of 636 cross-border movements were observed at the Flow Monitoring Points (FMPs). The average daily number flows was 29. This represented the same number of movements compared to May during which 29 individuals were observed on a daily basis. Botswana (56%), Zimbabwe (30%) and South Africa (12%) were the main countries of departure and Zimbabwe (79%), Botswana (17%) and South Africa (3%) were the main countries of intended destination of individuals passing through the different FMPs. Out of 636 individuals observed, 67 per cent were males and 33 per cent were women. Boys and girls (males and females below 18) made up five per cent of the individuals observed.

# FLOW MONITORING REGISTRY REPORT

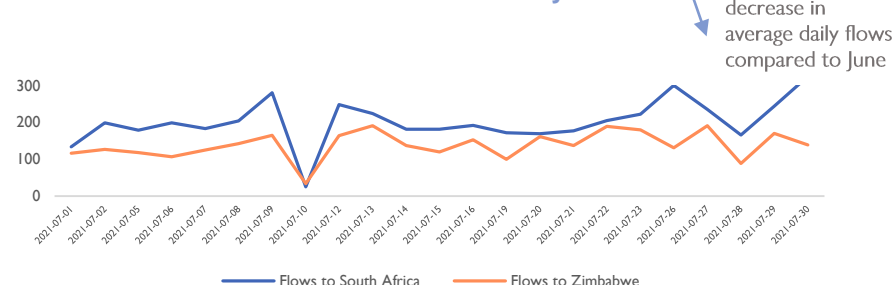

## ZIMBABWE – SOUTH AFRICA (BEITBRIDGE) | JULY 2021

### OVERVIEW

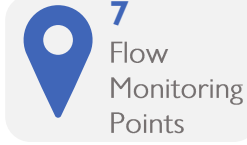

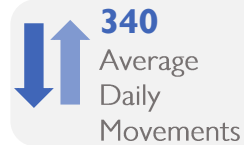

Over the reporting period, a total of 7,829 cross-border movements were observed at the Flow Monitoring Points (FMPs). The average daily number flows was 340. This represented a 11 per cent decrease compared to April during which 384 individuals were observed on a daily basis. The sharp decrease may be attributed to the tightened lockdown measures by the government of Zimbabwe. Zimbabwe (60%) and South Africa (40%) were the countries of departure and South Africa (59%) and Zimbabwe (41%) were the countries of intended destination of individuals passing through the different FMPs. Out of 7,829 individuals observed, 46 per cent were females and 54 per cent were males. There were 138 women who were visibly pregnant. Boys and girls (males and females below 18) made up 10 per cent of the individuals observed.

## MALAWI (MCHINJI) - ZAMBIA (MWAMI) | JULY 2021

### OVERVIEW

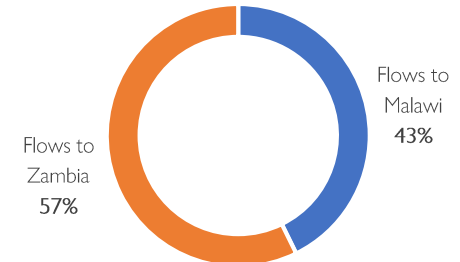

Over the reporting period, a total of 2,614 cross-border movements were observed at the Flow Monitoring Points (FMPs). The average daily number flows was 174. Zambia (53%) and Malawi (47%) were the countries of departure and Zambia (57%) and Malawi (43%) were the countries of intended destination of individuals passing through the different FMPs. Out of 2,614 individuals observed, 68 per cent were males and 32 per cent were females. There were 33 women who were visibly pregnant. Boys and girls (males and females below 18) made up 10 per cent of the individuals observed.

# FLOW MONITORING REGISTRY REPORT

IOM REGIONAL OFFICE FOR SOUTHERN AFRICA | JULY 2021

## METHODOLOGY

Flow Monitoring is a data collection activity which seeks to gather key information on mobility and migrant profiles. It begins by identifying zones in which large mobility flows occur and highlighting the characteristics and journeys of travellers in these zones. DTM teams, with the support of local authorities and partners, identify strategic points of transit, where Flow Monitoring Points (FMPs) are set up. At each FMP, DTM conducts two main activities: Flow Monitoring Registry (FMR) and Flow Monitoring Surveys (FMS). This report focuses on FMR data only. The FMR collects data at FMPs through direct observation and interviews with key informants, including staff working at transit stations, border patrol officers, local authorities, bus or taxi drivers and travellers themselves. The FMR gathers data on the number of travellers crossing FMPs, as well as the provenance, next destination, vulnerabilities and means of transport of travellers. At each FMP, data is collected by a team of enumerators. Data collection is carried out daily, between 8:00 am and 5:00 pm. Enumerators collect data via a mobile data collection form to ensure data integrity and quality. This report is an overview of the data collected from 1 to 31 July 2021.

**Flow Monitoring Point:** Flow Monitoring Points (FMPs) are points set up by IOM's Displacement Tracking Matrix in high mobility areas in each country covered (near borders or main travel routes).

## LIMITATIONS

Data collected in the framework of Flow Monitoring activities are the result of direct observations and interviews conducted at FMPs between 8:00 am and 5:00 pm. The data are not representative of all migration flows in the border area, and, because they only reflect the situation of observed or surveyed individuals, cannot be generalized. Temporal coverage of the data collection exercises is also limited to a specific time window. While data is collected daily, Flow Monitoring activities do not capture all flows transiting through FMPs. Data on vulnerability is based on direct observation and self-reporting. Therefore, the findings should be understood as mainly indicative.

Data collected for these exercises should be understood as estimations only. IOM does not make any warranties or representations as to the appropriateness, quality, reliability, timeliness, accuracy or completeness of the data included in this report.

*The opinions expressed in the report are those of the authors and do not necessarily reflect the views of the International Organization for Migration (IOM). The designations employed and the presentation of material throughout the report do not imply the expression of any opinion whatsoever on the part of IOM concerning the legal status of any country, territory, city or area, or of its authorities, or concerning its frontiers or boundaries. IOM is committed to the principle that humane and orderly migration benefits migrants and society. As an intergovernmental organization, IOM acts with its partners in the international community to: assist in the meeting of operational challenges of migration; advance understanding of migration issues; encourage social and economic development through migration; and uphold the human dignity and well-being of migrants.*

*The maps displayed in this report are for illustration purposes only. The depiction and use of boundaries, geographic names and related data shown on maps and included in this report are not warranted to be error free nor do they imply judgment on the legal status of any territory, or any endorsement or acceptance of such boundaries by IOM.*
