OVERVIEW

During the COVID-19 pandemic, IOM's Displacement Tracking Matrix (DTM), in collaboration with the World Health Organization (WHO), monitors the movements to and from Nigeria's Adamawa and Borno States, located in the North East Zone. Assessments are conducted at Points of Entry located along the border with Cameroon.

During the period 30 January - 05 February 2021, 203 movements were observed at two Points of Entry in Borno state. Of the total movements recorded, 91 were incoming from the Far North Region in Cameroon. Additionally, 112 outgoing movements were recorded from Borno State to the Far North Region in Cameroon.

A range of data is collected during the assessments to better inform on travellers' nationalities, sex, reasons for moving, mode of transportation and timeline of movement as shown in figures 1 to 4 below:

NATIONALITIES OF TRAVELLERS (FIG. 1)

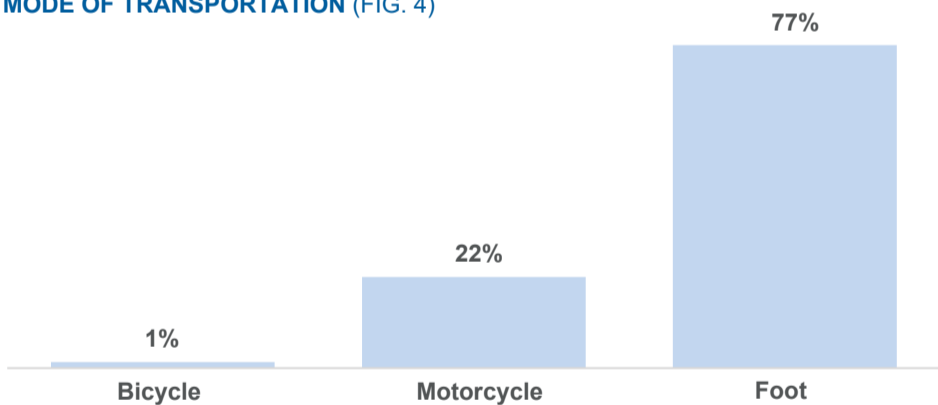

SEX (FIG. 2)

REASONS FOR MOVEMENT (FIG. 3)

Reasons for Movement	Number of Individuals	Percentage
Movement Due to COVID-19	5	3%
Forced Due to Insurgency	6	3%
Family Visit	10	5%
Economic Migration	17	8%
Seasonal	20	10%
Short Term Local Movement	145	71%
Grand Total	203	100%

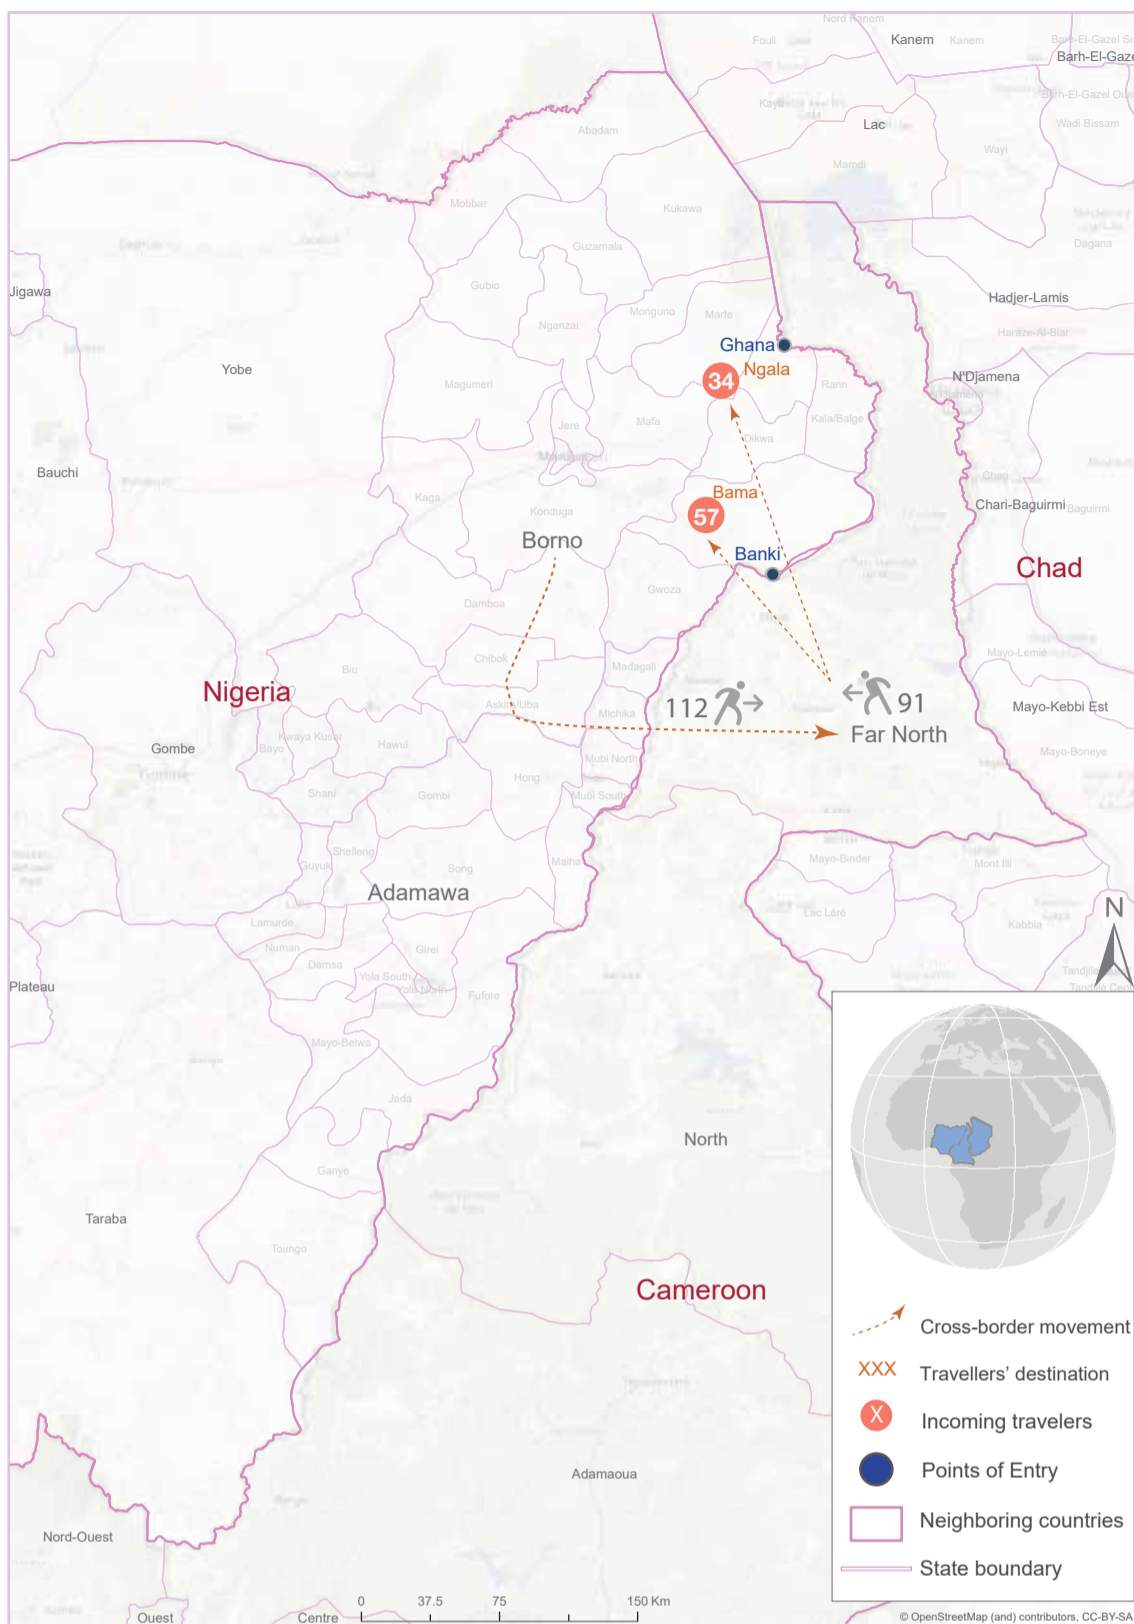

MODE OF TRANSPORTATION (FIG. 4)

TEMPERATURES TAKEN (FIG. 5)

HAVE YOU SOUGHT ANY MEDICAL CARE IN ANY HEALTH FACILITY WITHIN THE LAST 14 DAYS? (FIG. 6)

The map is for illustration purposes only. The depiction and use of boundaries, geographic names and related data shown are not warranted to be error free nor do they imply judgment on the legal status of any territory, or any endorsement or acceptance of such boundaries by IOM.

PASSENGERS HEALTH SCREENING

Enumerators stationed at Points of Entry conduct interviews with travellers and collect information about travellers' points of departures, intended destination, vulnerabilities, reasons for travel and mode of transportation. Additional questions concerning the COVID-19 pandemic are asked to determine if travellers exhibit any symptoms of COVID-19; if they recently were in contact with individuals exhibiting symptoms of COVID-19 or might have died from it.

Furthermore, the assessments serve to evaluate whether travellers sought medical care or took medication in the 24 hours preceding the interviews and to verify whether they are aware of whom to call in case of emergency. The results are shown in figures 5 to 8.

HAVE YOU HAD ANY OF THESE SYMPTOMS (FEVER, COUGH) IN THE LAST 14 DAYS? (FIG. 7)

HAVE YOU COME IN CONTACT WITH ANYONE WHO IS SICK IN THE LAST 14 DAYS? (FIG. 8)
