

# IOM LIBYA WEEKLY MIGRANT COVID-19 VACCINATION UPDATE - Vaccination Week #1 (3 - 9 Oct 2021)

Project Funded by The European Union

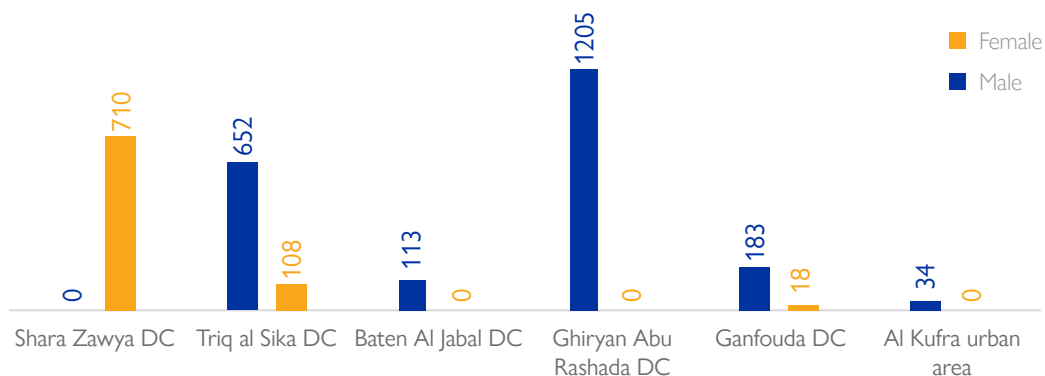

NATIONAL CENTRE FOR DISEASE CONTROL - LIBYA

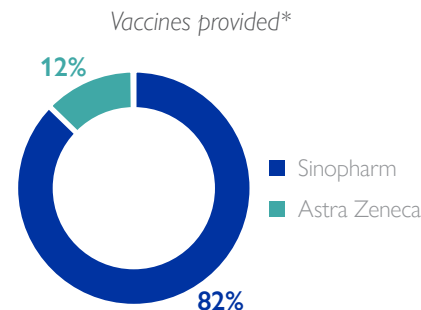

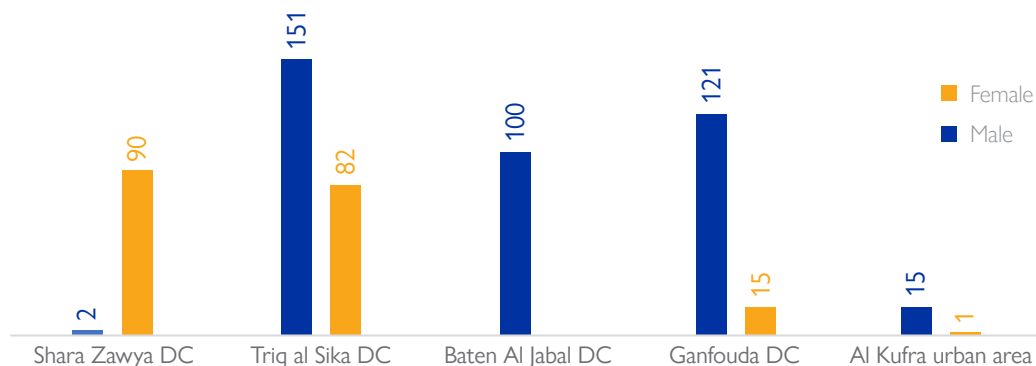

As part of the Libyan national COVID-19 vaccination campaign led by NCDC, in collaboration with IOM, during 3 - 9 October, a total of 3,023 adult migrants, including 836 females and 2,187 males attended awareness sessions on COVID-19 vaccinations in the Baten al Jabel, Ganfuda, Shara Zawya, Ghiryen Abu Rashada, and Tariq al Sika detention centres. Trained community mobilisers, accompanied by medical teams, provided the migrants and detention centre staff with critical information on the COVID-19 vaccines covering facts on its importance, dosage, side effects, and emphasized on its voluntariness. The awareness sessions also addressed questions and concerns about the vaccination process.

Gender disaggregation of migrants attending C-19 awareness sessions by location.

So far, 577 adult migrants, including 188 females and 389 males received their first dose of Sinopharm and Astra Zeneca vaccination.

Gender disaggregation of migrants vaccinated by location.

\* Vaccines are provided by Libyan National Center for Disease Control NCDC including the brand.

Awareness sessions attended by:

**3023**

Number of migrants vaccinated:

**577\***

\* Vaccine administration in Ghiryen Abu Rashada DC is planned next week.
