Displacement Tracking in Yemen includes the monitoring of key migrant and return locations on Yemen’s northern border with Saudi Arabia and southern coastal border. Enumerators placed at Flow Monitoring Points (FMPs) monitor the arrivals of migrants and Yemeni nationals in order to identify different patterns and types of migration, including quantitative estimates to help define the population of irregular migrants present in the country. Access constraints limit the ability to collect data at some migrant arrival points. IOM estimates that 84,378 migrants entered Yemen in addition to 29,419 Yemeni returns from Saudi Arabia from January to June 2019.

**2019 Migrant Arrivals (January - June): 84,378**

- **Unaccompanied children:** 4,102
- **Children less than 5 years of age:** 106
- **Physical disability:** 16
- **Old People:** 3
- **Pregnant or lactating:** 2

**Total Migrants per Month, by Nationality**
