Displacement Tracking in Yemen includes the monitoring of key migrant and return locations on Yemen’s northern border with Saudi Arabia and southern coastal border. Enumerators placed at Flow Monitoring Points (FMPs) monitor the arrivals of migrants and Yemeni nationals in order to identify different patterns and types of migration, including quantitative estimates to help define the population of irregular migrants present in the country. Access constraints limit the ability to collect data at some migrant arrival points. IOM estimates that 9,038 migrants entered Yemen in addition to 3,113 Yemeni returns from Saudia Arabia during July 2019 bringing the number of migrants who have arrived in Yemen in 2019 to 93,416 and the number of Yemeni returnees to 32,532.
